VSpoonDrain™

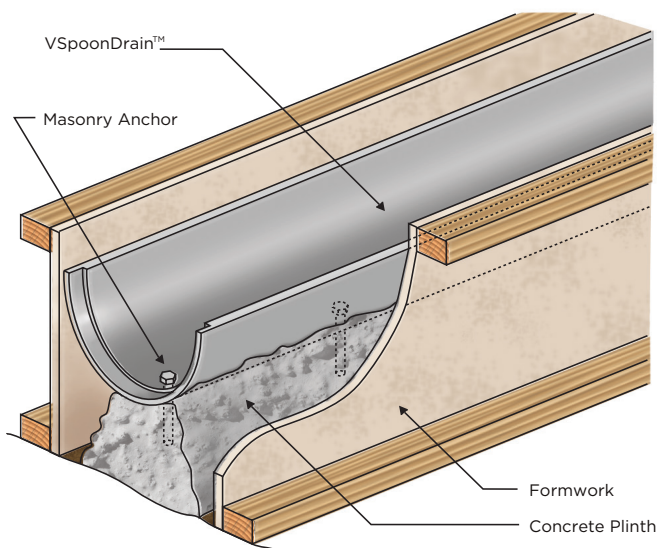

Open Channel Drainage

Suited to a range of projects, the VSpoonDrain™ Open Channel Drainage system is constructed using high performance reinforced concrete pipe.

Using VSpoonDrain™ as permanent formwork allows quick construction with minimal hand finishing of placed concrete.

Available in sizes from 225mm up to 750mm, there is a size to suit any application.

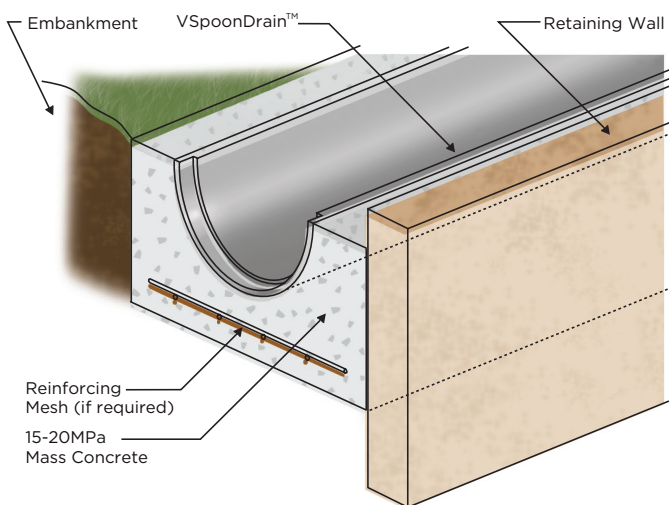

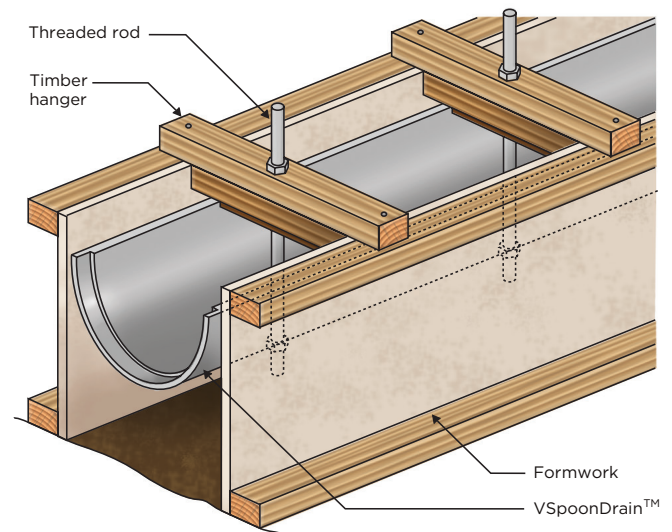

Concrete Plinth Installation

VSpoonDrain is not only versatile, it is proven and can be used for many applications including:

- Back of barrier drainage for retaining walls
- Drainage along the bottom of cuttings and retaining walls
- Channel drains alongside hardstand areas (grated covers can be used if required)
- Forming an open drain into concrete slabs.

Timber Hanger Installation

VSpoonDrain™ Open Channel Drainage
